

Why CENTRA is Different

RENO, NEVADA – 265 KEYSTONE

CENTRA Digital Interconnect is reshaping the digital infrastructure landscape in the United States, in response to the need for a more geographically diverse, highly interconnected data center platform.

CENTRA's core focus is to provide strategic flexibility in support of a wide range of digital ecosystem participants.

DIVERSE ECOSYSTEM OF CUSTOMERS

Our advanced neutral interconnection platform fosters the growth of diverse ecosystems by enabling seamless and efficient connectivity among networks, cloud service providers, and content delivery networks in environmentally sustainable data centers.

EMPOWERING INTERCONNECTION

A comprehensive platform portfolio of interconnection services, including public and direct peering, ecosystem partners, ensuring optimal data exchange, and low-latency connectivity.

AI-READY INFRASTRUCTURE

Support for high-density workloads designed to accommodate power intense AI and HPC applications with liquid cooling capabilities to the cabinet or cage.

OUR LOCATIONS

CENTRA has a presence in Charlotte, NC, Portland, ME, Reno, NV, and Columbus, OH and is executing plans to enter multiple additional markets with its purpose-built interconnection platform.

RENO, NV – RN02

265 KEYSTONE

Facility Overview
